

Not only is Kangen Water™ important for humans, but it's equally important for our animals.

In many cases our pets are exposed to the same type of toxins, poor diet and other factors that contribute to their overall health. Pets can benefit from Kangen Water™ too!

In a lot of cases, cats and dogs will experience an improvement in their health faster than humans. This is due to a faster metabolism so they can assimilate alkaline water at a faster rate. Importantly they prefer this water to tap water or bottled water. Try this for yourself by placing two bowls of water side by side, one containing alkaline water and the other containing regular water and you will see that they will gravitate towards the alkaline water!

Horses and Kangen Water™

Water is an important but often overlooked nutrient for horses. As a matter of fact, water may be the best medicine for many specific ailments for all animals.

A horse's body consists of approximately 65-75% water. The 10% discrepancy can be accounted for by differences in age and the amount of body fat and muscle mass.

Water is critical for all body metabolic activities and is required for a number of fundamental physiological processes, including normal utilisation and digestion of nutrients, regulation of body temperature and muscle contraction with strength, joint lubrication and waste elimination.

A horse's body is made up of about 75-80 gallons of water on average. The muscles, tendons and tissues in a horse are fairly delicate and the quality of those tissues will result in a horse's performance and their resistance to injury.

The quality and the quantity of the water that a horse consumes must therefore be a crucial part of this equation. Kangen Water™ is now available for horses and other livestock and they too can enjoy the health benefits of this miracle water.

The countless benefits of restructured micro-clustered alkaline, antioxidant water has been amazing for horses just as it has been for millions of families worldwide.

Save on vet bills!

Injuries, cuts, scrapes, bruises, flesh wounds, abscesses, fungal and bacterial infections, insect bites, thrush and much more can be addressed by using one of the 7 types of water that the Kangen™ machine generates. It's a healthier option and greatly reduces costs.

Listen to an amazing CD where trainers discuss the successes they have had with their horses when they drink Kangen Water™ and use it topically.
